

PROJECT DOCUMENT · 2026

Your pharmacy, under control.

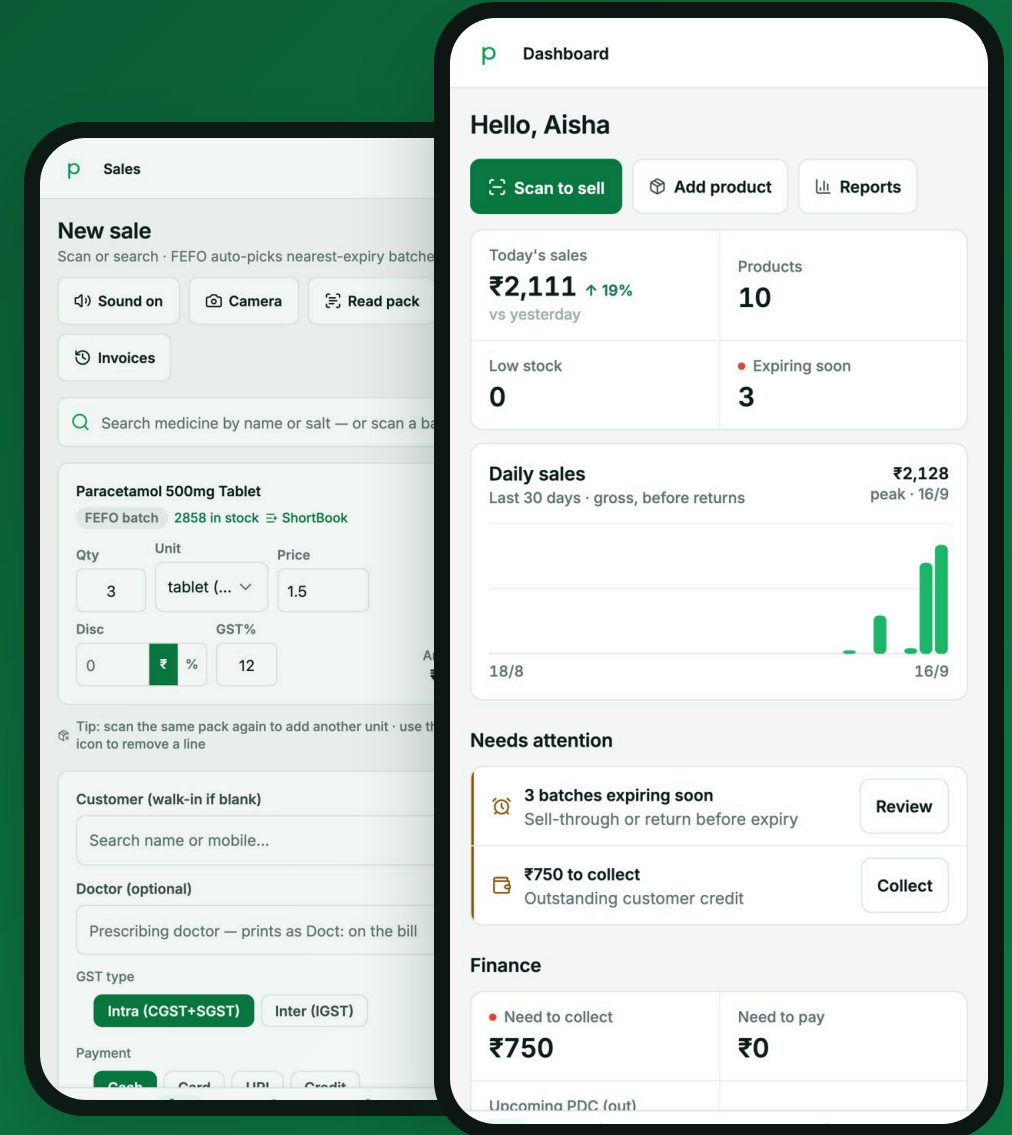

GST billing, batch & expiry stock control and purchase entry for medical stores and pharmacies in India.

iPhone

iPad

Android

Web

Designed & developed by **FiveM Infotech Private Limited**

01 · THE CHALLENGE

Running a medical store is still paper, guesswork and lost stock.

Slow billing at the counter

Manual bills and GST maths keep customers waiting in the queue.

Money lost to expiry

Short-dated stock is found too late to sell or return to the supplier.

Bills typed by hand

Every distributor invoice is re-entered line by line: batch, expiry, rate, GST.

No clear view of stock

Batch, shelf location and stock value live in registers or memory.

Compliance on paper

Schedule H / H1 sales and prescriptions are hard to record and trace.

Little staff control

Everyone sees everything, and nobody can tell who changed what.

The problem is not effort. It is that billing, stock and purchase records don't talk to each other.

02 · THE SOLUTION

Plusveda: one platform for the whole store.

Billing, purchase, stock and reporting share one live record, so the counter, the back office and the owner's phone always see the same numbers.

Sell

Fast GST bills

Receive

Bills read from a photo

Stock

Batch, expiry, location

Reorder

ShortBook to PO

Review

Reports & exports

Always in sync

Every sale updates stock instantly across all devices.

Works offline

Bills queue on the device and sync in order when back online.

Secure by design

Each pharmacy's data is isolated in its own workspace.

03 · CORE FEATURES

Everything a pharmacy needs, in one app.

GST Billing

CGST/SGST or IGST worked out automatically. Cash, card, UPI or credit.

AI Bill Scanning

Photograph a distributor bill; every line is read into a draft for review.

Batch & Expiry

Nearest expiry sold first (FEFO) with 30 / 60 / 90-day alerts.

ShortBook

A reorder list built from real sales, turned into a purchase order.

Prescription Register

Schedule H / H1 flagged; doctor and Rx recorded at the till.

MedGuide

Search 2 lakh+ medicines by brand, salt or maker; find substitutes.

Reports & Export

Sales, GST (HSN), expiry, warehouse and staff reports to Excel / PDF.

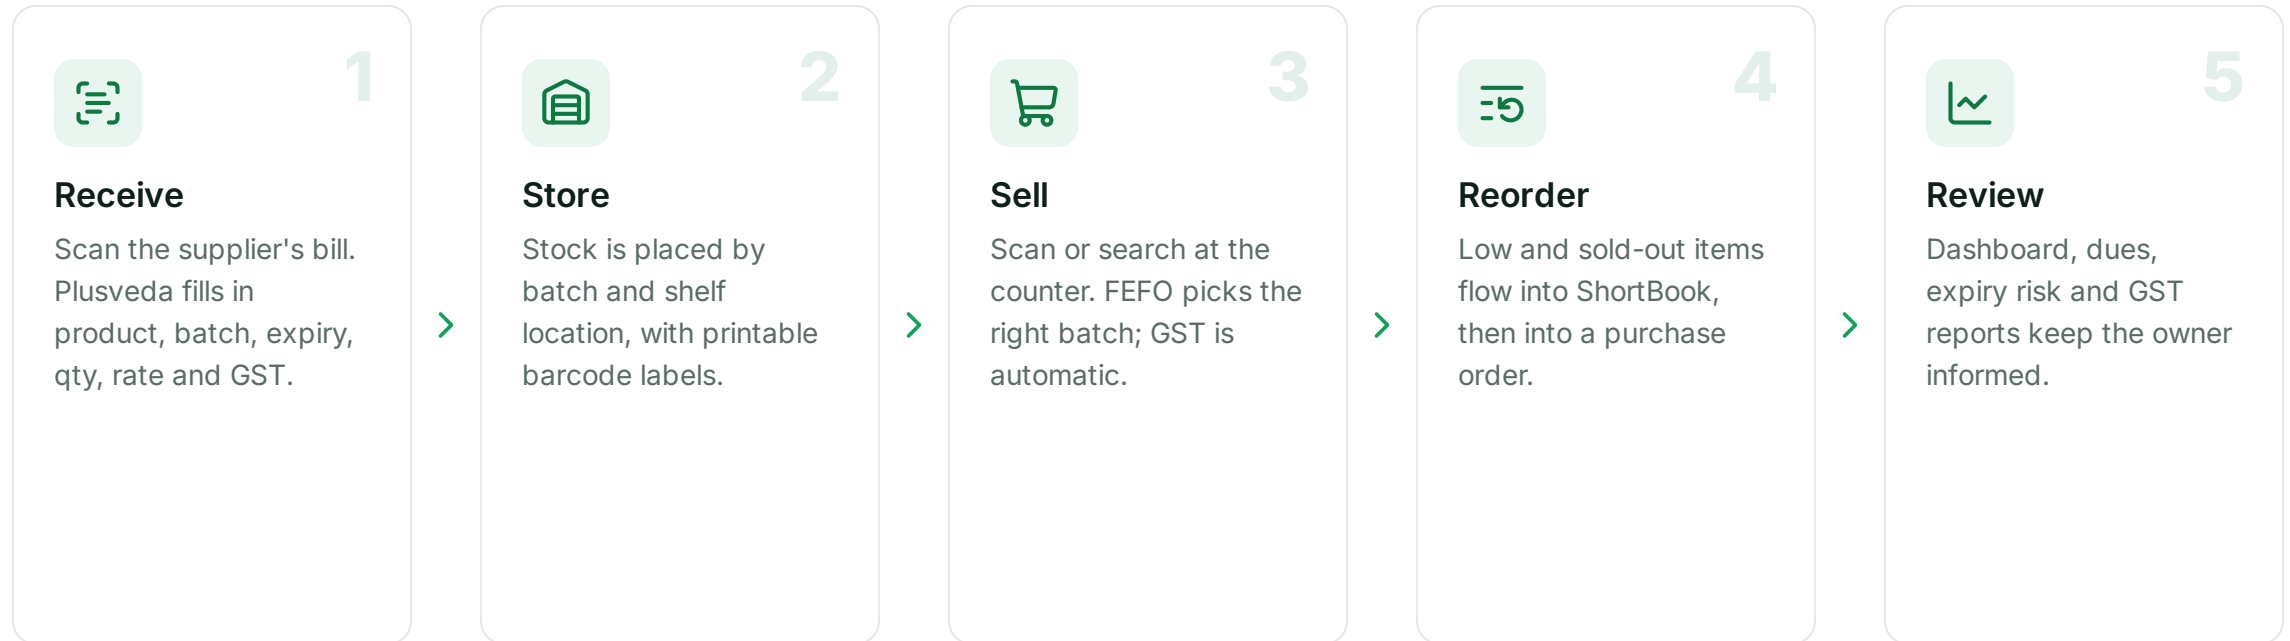

Team & Audit

Per-person permissions, full audit trail and device limits.

04 · HOW IT WORKS

A simple daily loop, from purchase to report.

 The same flow works on a phone at the counter, a tablet in the store room, or a browser in the back office.

05 · BILLING

Bill a customer in seconds.

Built for the pace of a busy counter.

- ✓ Scan a pack barcode or search by medicine name or salt
- ✓ Nearest-expiry batch picked automatically (FEFO)
- ✓ Intra-state CGST/SGST or inter-state IGST, calculated for you
- ✓ Cash, card, UPI or credit, with customer dues tracked
- ✓ Print or share the invoice on WhatsApp, with your signature or stamp
- ✓ Returns and part-returns recorded against the original bill

 **Offline billing:** bills are queued on the device and synced in order when the connection returns.

06 · PURCHASE ENTRY

Read the distributor's bill from a photo.

No more typing invoices line by line.

- ✓ Take a photo, pick from the gallery, or upload a PDF
- ✓ AI reads product, batch, expiry, quantity, rate, MRP, discount and GST
- ✓ Result is a draft the pharmacist reviews before anything is saved
- ✓ Goods-received note laid out like the bill, matching it to the paisa
- ✓ Purchase returns, purchase orders and supplier ledgers
- ✓ Cheque and post-dated cheque (PDC) register

Receive Stock

← Back to receive

Scan a bill
Photo, gallery or PDF — we read it, you confirm

Take photo **From gallery** **PDF / file**

Lay the bill flat in good light. Sideways photos are fine — you turn it the right way up on the next step.

No bill scanned yet
Snap the distributor's invoice and we'll pull out every product, batch and expiry.

Receive stock
Goods received note — batch, expiry, location & cost

Amount: 0.00

07 · STOCK & EXPIRY

Know exactly what is on the shelf.

Live quantity, batch, location and value.

- ✓ Every medicine tracked by batch, expiry date and shelf location
- ✓ Stock value at cost and at retail, updated with every sale
- ✓ Expiry alerts at 30, 60 and 90 days, with value at risk
- ✓ Damage and write-offs recorded with a reason
- ✓ Transfers between warehouses, racks and bins
- ✓ Barcode shelf labels for PDF or Zebra label printers

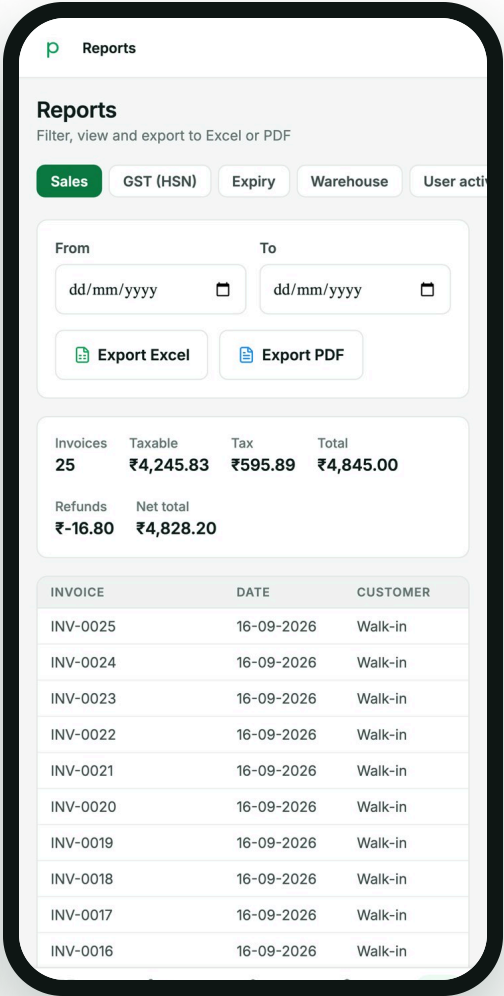

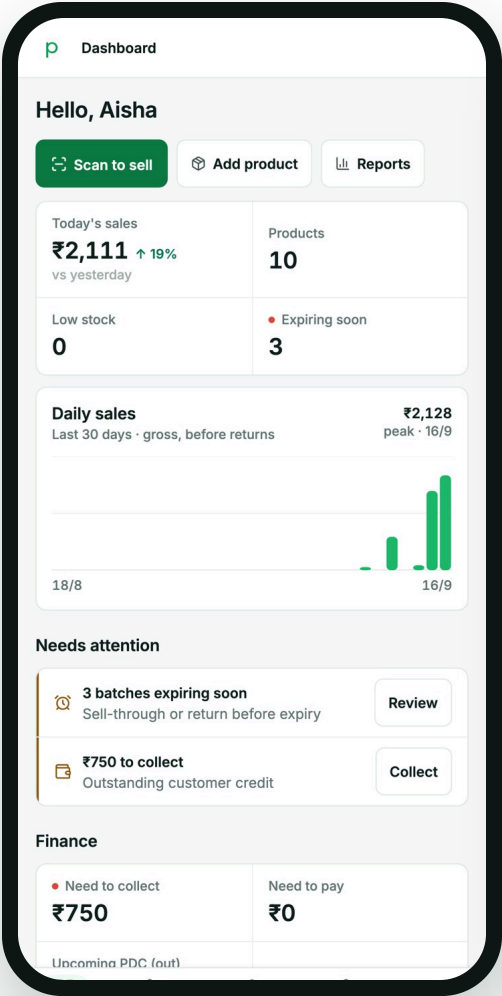

08 · DASHBOARD & REPORTS

The whole business at a glance.

For the owner, on any device.

- ✓ Today's sales against yesterday, and a 30-day sales trend
- ✓ Needs-attention list: expiring batches, money to collect
- ✓ Finance view of what customers owe and what is owed to suppliers
- ✓ Sales, GST (HSN), expiry, warehouse and staff-activity reports
- ✓ One-tap export to Excel or PDF for the accountant
- ✓ Personal reminders for reorders, GST dates and supplier calls

09 · TEAM, SECURITY & COMPLIANCE

Control who does what, and keep every record safe.

Team & access

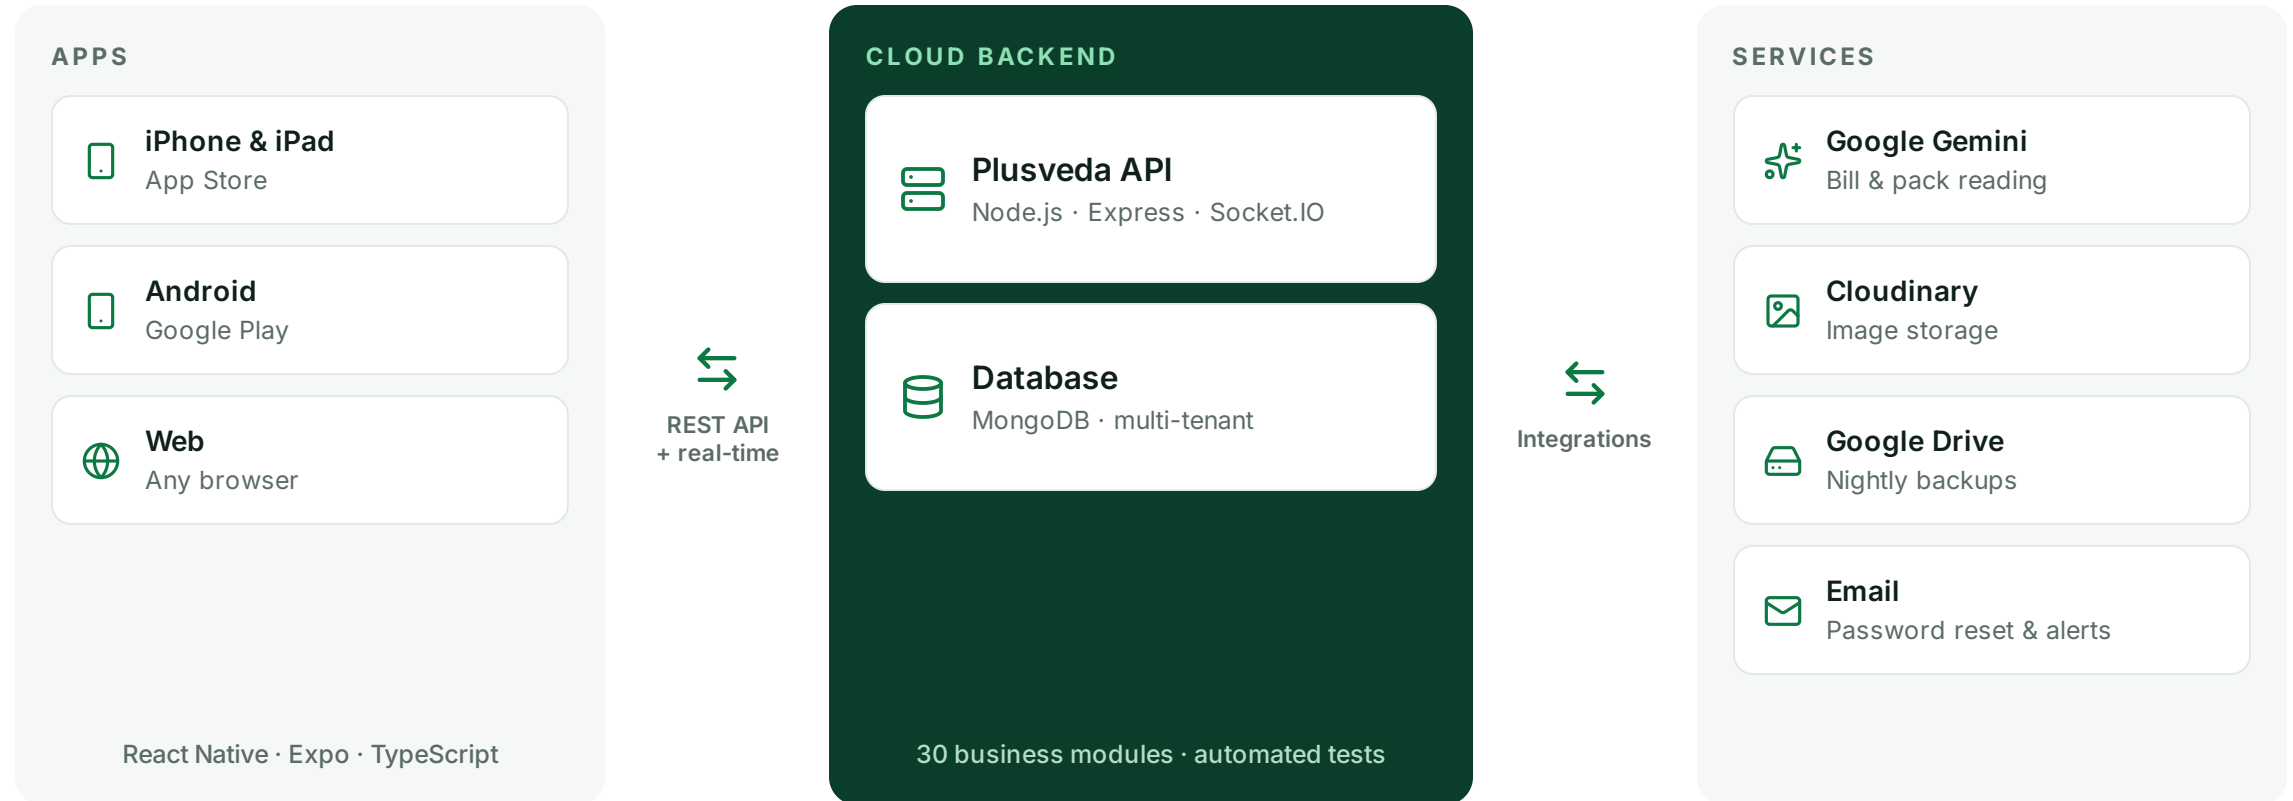

- ✓ **Admin** (owner) holds every permission
- ✓ **Staff** get exactly the permissions the admin assigns: Pharmacist, Cashier, Warehouse and more
- ✓ Settings and user management can never be given to staff
- ✓ Append-only audit trail of who did what, and when
- ✓ Limit how many devices one account can sign in on

Compliance & data safety

- ✓ Schedule H / H1 medicines flagged on every product
- ✓ Doctor and prescription recorded before a scheduled sale
- ✓ Each pharmacy's data isolated in its own workspace
- ✓ Token-based sign-in, rate limiting and hardened HTTP headers
- ✓ Nightly automatic database backups to Google Drive
- ✓ Consent asked before the first photo is sent for AI reading

10 · TECHNOLOGY & ARCHITECTURE

A modern, scalable cloud platform.

11 · BUILT AS SAAS

Ready to serve many pharmacies from day one.

Pharmacy workspaces

Each store gets its own isolated workspace, activated by the platform team.

Platform console

Create and manage pharmacies, users, limits and subscriptions.

Flexible plans

1, 3, 6 and 12-month terms with savings calculated automatically.

Shared medicine catalogue

A central catalogue that every pharmacy can draw products from.

Platform audit log

Every administrative action is recorded for accountability.

Over-the-air updates

App improvements reach users without a new store download.

12 · AVAILABILITY

Live on every platform a pharmacy uses.
